

Matrox professional graphics cards **for digital content delivery**

QID Pro

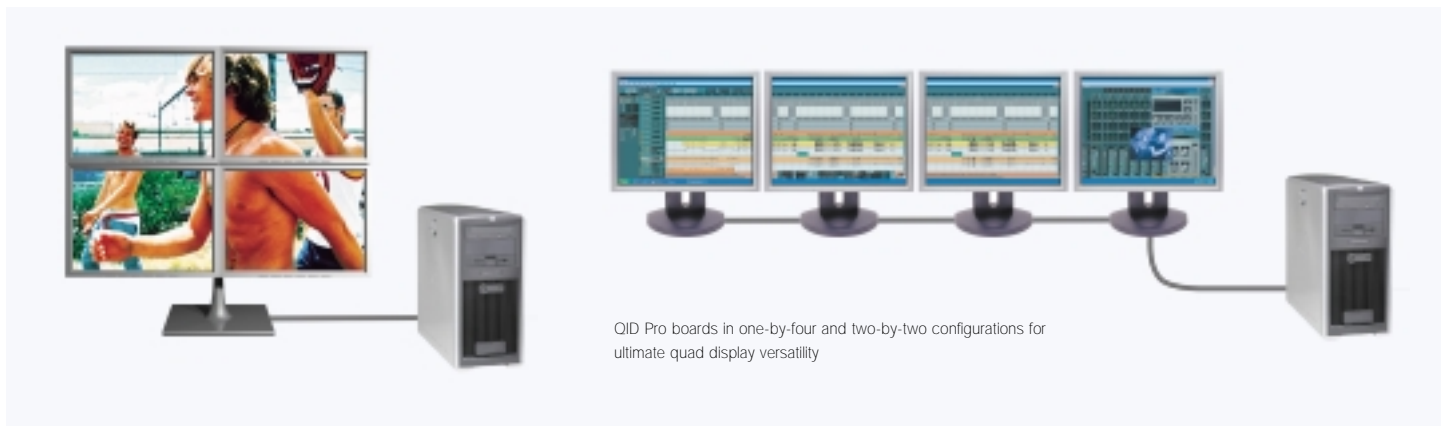

Matrox QID Pro - Accelerated PCI support for quad display set-ups

Whether it's organizing audio/video content across several displays in the studio or outputting video across multiple plasma displays at an event, specialized output and viewing requirements demand a specialized graphics card. Featuring unprecedented multi-display support, the Matrox QID Pro provides quad analog or digital output for the flexible arrangement and delivery of multimedia content to multiple displays organized in a variety of configurations.

QID Pro can be easily configured to display a host of content in numerous configurations

A single slot PCI solution, this remarkably versatile graphics card is perfectly suited for displaying content in either two-by-two or one-by-four configurations making it an ideal candidate for both public information display and audio/video editing requirements.

The QID Pro can also be paired with the Matrox Advanced Synchronization Module (ASM) in order to Genlock and Framelock footage being displayed across multiple screens. Taking this one step further, the Matrox ASM can also synchronize multiple systems equipped with QID Pro graphics cards, providing truly astounding multi-monitor real estate for a visually impacting set-up.

System requirements:	
Interface	PCI - supports 33 / 66 MHz buses
Memory	256MB
Multi-display support	Quad DVI / Quad VGA
Compatible with Matrox ASM	Provides Framelock and Genlock support
